

Capella®  
WOOD FLOORS

Capella® Wood Floors  
A Great Value in Hardwood Flooring

# THE NATURAL CHARACTER OF CAPELLA® HARDWOOD

Capella® Hardwood is abundant in natural character. In each carton, you can expect high color and character variation – each plank is unique in the type and amount of character featured. The grade of this product, classified as rustic, means the following natural characteristics of wood should be expected: Knots, Filled Checks, Large Mineral Streaks and High Color Variation.

## Knots

Imperfections caused by living wood grain that grows around branches, sometimes filled with an epoxy for a smoother finish.

## Filled Checks

A crack that occurs when wood dries, that is filled with an epoxy that bonds to the wood and prevents further expansion.

## Large Mineral Streaks

Discolored olive and greenish-black areas common in many hardwoods.

## High Color Variation

Differences in stain color, from plank to plank, can vary widely, particularly with Natural stained floors.

Because no two boxes of finished product are the same, samples, swatches and room scene visuals can all vary from the actual product received. Customers should be made aware of these naturally occurring, and varied, characteristics to set clear expectations of a final installation.

For an optimal installation, it is critical to mix planks from multiple cartons. Pre-planning the layout of the planks across the entire installation also ensures that the natural character is evenly distributed throughout the floor. With careful consideration and planning, a properly installed Capella® Hardwood floor will showcase the beauty, visual texture and natural character of hardwood.

# TRIM & MOLDING

Add the perfect finishing touch by complementing the look of your new floor with coordinating trim and molding available in a wide selection of matching colors and profiles.

**Threshold** – Finishes the space where hardwood flooring ends (such as sliding glass doors, along wall bases, door thresholds and carpet).

**T-Molding** – Fills the gap at doorways, and finishes spaces between the two areas of hardwood flooring.

**Reducer** – Provides a smooth transition from your hardwood floor to another type of flooring of a lower height. Also, finishes the space where hardwood flooring ends against a vertical surface and where quarter round cannot be used (such as sliding glass doors, against cabinet toe kicks, or carpet).

**Quarter Round** – The classic finish to your hardwood floor, used where wall and flooring meet.

**Stair Nose** – The durability of hardwood flooring makes a great choice for staircases.
